## I. Background and Overview

Youth involved with multiple systems of care (e.g., child welfare, education, behavioral health, and juvenile justice) are a high needs population. Typically, these youth have histories of maltreatment and trauma; experience significant educational challenges; are more likely to face disparate treatment on the basis of race, gender, and sexual identity; have high levels of exposure to community and family violence; and suffer from untreated mental health needs and substance use issues (Herz, Lee, Lutz, Stewart, Tuell, & Wiig, 2012). As a result of these challenges, these youth require systems and organizations to work together in a collaborative manner to realize improved outcomes.

One of the greatest challenges in serving at-risk youth is determining how to effectively deal with the multiple systems with which they are often engaged. Often these systems lack the formal relationships and structural alignment that research identifies as being valuable to improving outcomes for this population (Herz, Ryan, & Bilchik, 2010). The absence of a formalized infrastructure to collaborate across systems can result in a lack of coordinated case management, fiscal inefficiencies, conflicting communication with youth and families, and youth becoming further entrenched in each system. While many jurisdictions acknowledge the benefits of improving coordination and cooperation across systems, changing ingrained practices, policies, and behaviors presents a myriad of challenges. Human service, justice, and other agencies often lack understanding of each other's functions and organizational relationships that support integration and collaboration.

Jurisdictions that have the infrastructure in place to support system improvement efforts and multi-system collaboration will find themselves in a better position to enhance outcomes for youth, families, staff, and communities. Broadly defined, this infrastructure is composed of three essential elements:

1. An appropriate and engaged leadership team to oversee multi-system efforts;
2. An environment in which each system has thorough knowledge of its partner systems within the community, including clear understanding of the legal, structural, financial, and cultural constraints that informs each system's actions; and
3. A robust information and data-sharing infrastructure to enhance both case-level decision making and population-level policy decisions.

In order to help jurisdictions develop or improve these essential elements of their multi-system collaboration infrastructure, the Center for Coordinated Assistance to States (CCAS), through funding from the U.S. Department of Justice, Office of Justice Programs, Office of Juvenile Justice and Delinquency Prevention, is offering communities an opportunity to apply for the Multi-System Collaboration Training and Technical Assistance (MSC-TTA) program. This program, offered at **no cost** to participants, will assist multi-disciplinary teams in developing a stronger infrastructure to improve system processes and outcomes for at-risk youth involved in multiple systems.

States, tribes, territories, local governments, and community agencies and organizations participating in this program will benefit from having:

- A better understanding of the multi-system operations within their jurisdiction;
- Support and clear direction to produce a multi-system strategic plan designed to mitigate and/or improve identified issues in cross-system collaboration; and
- A connection to resources and content experts to assist in mobilizing their efforts.

By the end of the program, participating teams will have increased their knowledge about the inter-workings of their youth-serving systems; gained a variety of tools to improve outcomes for youth involved in multiple systems of care; and enhanced collaboration and teamwork among key system partners. The final product of the program will be a focused action plan that the teams develop to guide the implementation of the policies, practices, and principles discussed within the MSC-TTA. These action plans will be unique to each jurisdiction's individual needs, strengths, and goals for multi-system reform.

## **II. Who Should Apply**

Teams representing states, tribes, territories, local governments, and/or community agencies and organizations that wish to improve outcomes for youth, families, staff and communities; seek to enhance multi-system processes; and are committed to cross-system collaboration are encouraged to apply. This training and technical assistance program is designed to help jurisdictions develop or enhance their formal infrastructure for cross-system collaboration. Therefore, the MSC-TTA program will benefit jurisdictions that are:

- Demonstrating a commitment to implementing cross-system reforms and operational improvements (i.e., formal collaboration between juvenile justice, child welfare, the courts, school systems, behavioral health, and other partners in serving multi-system youth);
- Looking to achieve substantial improvement in case- and system-level collaboration;
- Expecting to undertake significant efforts around system integration or the merger/splitting of two or more agencies; and/or
- Interested in reinvigorating previous system improvement efforts and/or updating multi-system collaboration protocols devised under previous efforts.

Participating in the MSC-TTA requires a commitment of leadership to support system change that will bring multi-system collaboration to fruition. Having leadership from all applicable systems, including the family court, child welfare, juvenile justice, law enforcement, behavioral health, and education, is paramount to addressing the unique needs of youth involved in multiple systems. Teams that have committed leadership from key human and public service organizations and other community partners will be in the best position to benefit from the training and technical assistance provided through the MSC-TTA.

## **III. About the Training and Technical Assistance Program**

The administration of the Multi-System Collaboration Training and Technical Assistance program will be led primarily by the Georgetown University McCourt School of Public Policy's Center for Juvenile Justice Reform (CJJR) in conjunction with its CCAS partners.

CJJR has an extensive history of working with upwards of 90 jurisdictions across the country to implement multi-system change through its Crossover Youth Practice Model.

A cohort of up to six sites will be selected to participate in the MSC-TTA, a distance-learning program that is informative, instructional, and interactive. During this seven-month period of engagement, the MSC-TTA Training Team engages participants in a series of training and technical assistance distance-learning sessions with content pertaining to:

- Assessing leadership strengths and opportunities for improvement;
- Understanding the systems change process and how each step applies to the jurisdiction's goals for improvement;
- Developing greater trust, knowledge, and awareness of systems within the collaborative;
- Achieving a greater understanding of the policies and practices of each partner organization;
- Strengthening data and case-level information sharing between partner agencies;
- Formulating logic models to demonstrate how the planned system change will directly impact youth and system outcomes;
- Implementing strengths-based approaches in engaging and empowering youth and families;
- Enhancing the coordination of operations between agencies; and
- Laying the groundwork for both short- and long-term improvement efforts.

To assist in the development of a jurisdiction's action plan, the MSC-TTA will provide a series of technical assistance activities on a variety of topics that are designed to build on one another. Sites will be expected to incorporate goals associated with these TTA topics into their action plans. TTA will be provided through training sessions that consist of webinars, all-sites, topical cluster, and individual team conference calls, and individualized direct team assistance as needed. All sessions will aid jurisdictions to incorporate research and best practices into their multi-system collaboration efforts. MSC-TTA topics will include:

1. **Leading a System Change Process** – This session will introduce a framework for implementing significant and powerful systems change designed to improve outcomes for multi-system youth. Teams will consider different ways of implementing systems change in their community by reviewing both the academic literature on the subject and real-world examples of communities that have made lasting reforms to their child-serving systems. This session will also explore the necessary elements needed both in leadership and within the workforce of an organization to ensure sustainability of change efforts.
2. **Developing System Maps and Gap Analyses** – This session will provide an overview of how to conduct a mapping of current systems and highlight how using this information can lead to a better understanding of how systems serve youth and families. In addition, participating teams will complete a Gap Analysis that assesses their strengths around four key components of multi-system collaboration: system connectedness; data and information sharing, quality assurance, and workforce

training. This session will allow sites to thoroughly explore the ways in which their own systems function and how protocols for stronger collaboration can be adapted to the pre-existing structure of each agency.

3. **Sharing Information Across Systems** – This session will teach jurisdictions the essential steps for developing a robust information sharing infrastructure among child- and family-serving agencies. Participants will better understand how federal laws and state statutes support sharing of information in a cautious and inclusionary manner. The session will highlight what kinds of information partners need to share, and can share, to better serve youth in multiple systems.
4. **Utilizing Data to Enhance Decision-Making and Demonstrate Outcomes** – This session will address how sites can utilize their data to better understand trends in the population of youth being served by multiple agencies and identify areas in need of reform. This session will also discuss the development of a logic model that reflects a direct connection from the reform efforts to population and system indicators. This will include discussion about obtaining data, establishing a manageable and affordable data platform, and presenting/communicating data in a way that is engaging and informative.
5. **Empowering and Strengthening Relationships with Youth and Families** – This session will focus on the critical need to have families and young people involved at the core of a strength-based case practice model and engaged in the system change effort. It will explore practical ways that jurisdictions can do this by providing examples of effective collaborations with youth and families.
6. **Developing a Plan for the Implementation of System Change** – This session will guide jurisdictions through the process of developing a focused action plan that presents a united vision and communal objectives and outlines the appropriate steps for enacting system change in their jurisdictions.

#### IV. Anticipated Outcomes for Participating Jurisdictions

The MSC-TTA offers a developmental process which requires the selected sites to engage in a series of activities that focus on identifying existing barriers to partnership development and information sharing, understanding how youth are served in various contexts, acknowledging how agency culture impacts change, challenging the role of leadership and empowering others in the change process, and identifying ways to truly partner with and empower youth and families.

This process is designed to foster trust, understanding, and collaboration among involved systems. In addition, jurisdictions will develop concrete tools throughout the MSC-TTA to enhance the systems-change process and improve outcomes for multi-system youth. Specifically, MSC-TTA sites will develop:

1. A signed **Memorandum of Agreement** from system leaders that supports multi-system collaboration and outlines the ways in which each agency will participate in and support this effort within their jurisdiction.
2. A series of **System Maps** that outline the movement of youth through and across various systems. These maps will assist jurisdictions in identifying points of

intersection and developing specific protocols for treating youth in a cross-systems manner.

3. A comprehensive **Gap Analysis** to identify areas of strength and areas in need of improvement in multi-system collaboration. The Gap Analysis will help jurisdictions target specific areas of reform in their Action Plans.
4. A focused **Action Plan** that will provide jurisdictions with a step-by-step plan for implementing their specific systems-change goals. This Action Plan will be the final product of the MSC-TTA and build upon the practices, principles, and protocols discussed within the program. This action plan will include process and outcome measures to be analyzed on a short- and long-term basis to understand the impact of the proposed reform effort.

In addition to these specific tools, program participants may choose to use their access to resources, content experts, and a learning community of other jurisdictions to develop other materials related to improving multi-system collaboration in their individual communities. Examples of materials jurisdictions may develop throughout the MSC-TTA include:

- A uniform consent form for sharing client information across systems;
- A plan for conducting focus groups and other outreach efforts to better solicit the feedback and opinions of system-involved youth and their families;
- Brochures, flyers, and other promotional materials to engage community partners, youth, and families in their multi-system efforts;
- A logic model that shows the direct link between the reform efforts and the anticipated population and system outcomes; and
- An inventory of services, resources, or other local activities related to the treatment of multi-system youth.

Throughout the program, participating jurisdictions will also be expected to develop outcome measures that will be tracked throughout the implementation phase of their multi-system efforts. These will include system-level performance measures (e.g., number of services provided, number of youth served, number of multi-disciplinary meetings held, etc.) and population-level performance measures specific to their multi-system goals (e.g., high school graduation rates, prevalence of substance use disorders, arrest and recidivism rates, etc.). The MSC-TTA Training Team will work with each jurisdiction to identify appropriate outcome measures and incorporate them into a robust performance evaluation process as part of the final work plan.

## What Should Participants Expect From the MSC-TTA Program?

By actively engaging in the formal technical assistance process and utilizing the various tools developed throughout the program, jurisdictions will have made important improvements to their infrastructure for serving multi-system youth. By the end of this program, sites will:

- Have an **appropriate and engaged leadership team** that will oversee future reforms;
- Have greater **communication, trust, and understanding** with their partner systems;
- Have greater familiarity with the tools to strengthen **youth and family engagement** at the policy and practice level;
- Have completed the preparatory work in support of a fully operational and **robust local information-sharing infrastructure** (e.g., collecting existing information sharing agreements and commonly used consent forms, reviewing local and state laws, and identifying key participants for an information sharing workgroup);
- Better **understand their respective data systems**, how data is collected and shared, and how data can inform system reform efforts; and
- Have developed a **work plan** to better effectuate the reform efforts and the principles and practices of the program.
- Have been connected to a **network of resources** to support multi-system collaboration, including materials posted on the MSC-TTA Wikispaces platform, a website exclusively accessed by program participants and alumni.

## V. MSC-TTA Program Expectations

The program mandates that sites are actively engaged in the distance learning TTA process, including the completion of various pre-work and follow-up assignments, through a routine schedule of:

- Collaborative topical webinars to explore and discuss multi-system issues (topics listed above);
- Facilitated conference calls that provide an opportunity for sites to discuss their successes, challenges, and barriers; and
- Individualized TTA to address site-specific challenges.

The TTA will typically follow an approximate schedule of one webinar and one conference call each month. Attendance at each webinar and conference call will be recorded to ensure robust participation from each jurisdiction.

Each jurisdiction will develop a multi-disciplinary team with representation from each of the youth-serving systems that are key to the jurisdiction's multi-system collaboration goals. Sites are expected to participate in individual team meetings outside of the TTA events in order to develop their projects and focused action plans. While full participation from the entire team may not always be possible at each TTA event and team meeting, some level of representation from each participating system is required.

Finally, it is expected that participating teams will thoughtfully engage with the other teams involved in their cohort. This engagement may occur during the webinars and conference calls, over the program's web-based communications platform, or outside the program's structured TTA if desired. This level of engagement will enhance a key benefit of the MSC-TTA program design: the knowledge and experience of participating teams. Teams should come to each TTA session prepared to share their experiences on different multi-system issues and provide guidance and advice to their peers. This peer-to-peer engagement, coupled with the information provided by the MSC-TTA Training Team, will support the formation of a multi-dimensional learning community dedicated to addressing the challenges in serving a high-needs population.

## VI. Application Process and Selection Criteria

### 1. Informational Call

CJJR will host a one-hour informational call about the MSC-TTA for those sites interested in applying on October 4, 2016 at 2:00 pm ET. The call-in information is:  
1-866-910-4857  
Passcode: 863624#

Applicants are encouraged but not required to participate on the call.

### 2. Application Submission

Interested jurisdictions must submit an application **no later than 11:59 pm (in the applicant's time zone) on November 11, 2016 at** <http://cjjr.georgetown.edu/mscttaapplication/>

A panel consisting of CCAS organizations and MSC-TTA consultants will review the applications. The criteria for selecting jurisdictions include:

- A demonstrated commitment by the site to addressing issues through multi-system collaboration, including any past collaborative efforts;
- Evidence of the commitment of leadership from the site's family court; juvenile justice and child welfare agencies; and other key system leaders needed to oversee the project being proposed by the applicant (the strongest applications will include, as appropriate, evidence of participation by many if not all of the stakeholder groups listed in Section VII – Question 6); and
- Clarity and completeness of responses to the application questions.

### 3. Notice of Acceptance

On December 1, 2016 up to six sites will be notified of their acceptance to the MSC-TTA program. Those notices will be sent via email to the identified parties on the application by 5 pm ET. All selected sites must be willing to complete the assigned pre-work by December 16, 2016 and available to participate in the first webinar scheduled for January 11, 2017 from 1:00 pm-3:00 pm ET.

## **VII. Application Guidelines**

Applications are to be submitted by 11:59 pm (in applicant's local time zone) on Friday, November 11, 2016. The application document must be downloaded and submitted online at:

<http://cjjr.georgetown.edu/mscttaapplication/>

Applicants must provide the required information and answer the application questions in the provided document available at the above web address. Please adhere to the following guidelines while completing this application document:

- Be sure to write your response to each section in the provided space in the application document.
- Do not submit an application in excess of eight printed pages, single-spaced, and size 12 font including a cover page noting the jurisdiction name and application point of contact.
- Include page numbers in your application document.
- It is recommended that the electronic document be in PDF form, but Microsoft Word documents are also accepted.

When responding to the following application questions, ensure that your responses reflect a multi-system perspective. Each question will be scored individually and contribute to an overall application score, therefore it is important that each question is answered completely. The overall application score will be considered by members of the CCAS organization and MSC-TTA consultants when selecting the jurisdictions to participate in the MSC-TTA program.

### **Application Questions:**

1. Prove a listing and brief description of the agencies and/or organizations applying for the MSC-TTA.
2. Briefly describe the specific site that will be the target of the multi-system work (e.g., state, tribe, county, city, community). Please include information such as the location, population size, and other demographic information that is important to note about the site.
3. Indicate why the site is interested in participating in this program by describing the multi-system issue on which it wishes to receive TTA. Explain why the site considers

this issue to be important, what it hopes to achieve, and note any special challenges faced by the partner agencies and organizations in addressing the identified issue.

4. Briefly describe the site's family court, and child welfare and juvenile justice agencies, including type of organization, size, client population, county/state/tribal administered. For example, the juvenile justice system may be state-administered and the child welfare system may be county-administered.
5. Briefly describe the site's education, behavioral health, and law enforcement agencies, including their structure and the population they serve. If there are multiple law enforcement and education entities describe the one that predominantly serves the targeted area.
6. Indicate which of the following stakeholder groups in the site will participate in this collaboration:
  - Behavioral Health (Mental Health and Substance Abuse)
  - Child Welfare
  - Community Providers and Advocates (e.g., Youth and Family Advocates)
  - Court Appointed Special Advocates (CASAs)
  - Education
  - Family Court
  - Guardians Ad Litem
  - Juvenile Justice
  - Law Enforcement
  - Attorneys (Dependency and Delinquency)
  - Other (Please describe)
7. Describe any child-, youth- and family-focused multi-system collaboration in which the site has engaged and the outcomes achieved as a result. Include any TA that the site is presently receiving, or due to receive, that is related to the problem you want to address.
8. Describe the site's ability to gather and analyze data from multiple agencies, including the use of any existing multi-system databases.
9. Describe the site's strengths with respect to collaboration and identify particular areas on which the site would like to improve.
10. Please provide additional information not covered above regarding your site that is relevant to the review of your application as a participant in the MSC-TTA.

**Additional Information to Be Submitted with the Application**

Provide the following information (this information is excluded from the page limit):

- Names, titles, organizations (using full names, rather than acronyms), telephone numbers, and email addresses of the primary authors of the application;
- Names and email addresses for the lead family court judge, and child welfare and juvenile justice agency directors; and
- Name, title, email address, and phone number for the primary point of contact during the application process.

## VIII. About the Center for Coordinated Assistance to States

Through funding from the U.S. Department of Justice, Office of Justice Programs, Office of Juvenile Justice and Delinquency Prevention, the American Institutes for Research (AIR), Georgetown University McCourt School of Public Policy's Center for Juvenile Justice Reform (CJJR), and the Council of Juvenile Correctional Administrators (CJCA) have partnered to form the Center for Coordinated Assistance to States (CCAS). While CCAS provides a variety of TTA supports to jurisdictions across the country (as enumerated below), in this instance CCAS coordinates the delivery of TTA to states, tribes, territories, local governments, and community agencies and organizations looking to improve outcomes for at-risk youth and youth involved in juvenile justice, child welfare, and related systems of care.

The broader range of TTA areas on which CCAS focuses includes:

- Delinquency prevention, intervention, and system improvement;
- Maximizing state advisory group impact;
- Evidence-based approaches in detention and commitment;
- Information sharing, dually-involved youth, and systems improvement; and
- Emergency preparedness.

CCAS provides TTA using a variety of mechanisms, such as coaching, on-site training, toolkits, issue briefs, webinars, mentoring, establishing communities of practices, and brokering resources.

For more information on CCAS and its partnering organizations, please visit the following websites:

- CCAS: <http://www.ojdpccas.org>
- AIR: <http://www.air.org>
- CJJR: <http://cjjr.georgetown.edu>
- CJCA: <http://cjca.net>

## IX. Application Checklist and Key Dates

- Participate in the informational call on Tuesday October 4, 2016 from 2:00 pm-3:00 pm ET
  - Call-in number: 1-866-910-4857; passcode: 863624#
  - Applicants are encouraged but not required to participate
- Submit completed application by Friday, November 11, 2016 at <http://cjjr.georgetown.edu/mscttaapplication/>

- Receive notice of selection decision on December 1, 2016 by 5:00 pm ET
- Submit pre-work assignments by December 16, 2016 at 5:00 pm ET
- Participate in the initial webinar for selected jurisdictions on January 11, 2017 from 1:00 pm-3:00 pm ET

All inquiries regarding the MSC-TTA should be directed to Sam Abbott via email at [sca40@georgetown.edu](mailto:sca40@georgetown.edu) or via phone at 202-687-7765 or Macon Stewart via email at [macon.stewart@georgetown.edu](mailto:macon.stewart@georgetown.edu).

To learn more about the Center for Juvenile Justice Reform's role in the Center for Coordinated Assistance to States, please visit our website at <http://cjjr.georgetown.edu/our-work/center-for-coordinated-assistance-to-states/>
